

Software Developer

What is Bold Commerce?

Named one of Canada's fastest-growing tech companies by Deloitte, Bold Commerce is a software company specializing in innovative ecommerce apps and solutions for businesses of all sizes. Staples Canada, Barstool Sports and tentree are among the 90,000+ brands in over 170 countries around the world that trust Bold's suite of ecommerce tools to power their online stores every day.

Here at Bold, we live by the [Builders Code](#), our shared set of practices, beliefs and values that help to shape this amazing company. We believe in challenging each other to create the best products and to constantly improve, all to ensure we deliver the best results to our merchants at all times.

Bold adopts an agile methodology that focuses on releasing small things frequently, providing rapid feedback, and delivering value to merchants every day. Bold embraces agile practices including test-driven development (TDD), continuous integration (CI), continuous delivery (CD), short iterations, daily standups, retros, and pair programming.

Here's what we're looking for

We're looking for software developers with a wide range of experience and exposure to different technologies to add to our forward-thinking, driven development teams. At Bold we use PHP, Go, Ruby, and JavaScript, however, if your experience is with other languages we'd still love to meet you!

More than just technical skills, we're looking for like-minded individuals who are generally awesome and will make the office a better place for everyone.

We're looking for someone who:

- Likes to get shit done
- Resonates with our [values](#)
- Is motivated and passionate about shipping high quality software
- Is driven to take a feature from concept to production
- Has an understanding of how to build scalable and secure distributed systems
- Has post-secondary education in Computer Science or equivalent program and/or related work experience. We are looking for a wide range of experience!

Other skills that will get you far:

- Experience with PHP, Go, Ruby, or Javascript
- Comfortable with macOS or Linux
- Experience with or interest in TDD, CI, and CD
- Experience working with Laravel, or other Symfony based frameworks
- Front-end frameworks like React, Angular, or VueJS
- Docker, Kubernetes, and Google Cloud Platform or another cloud platform
- Concourse, Jenkins, or other CI systems
- MySQL, Postgres, or other database management systems

If you think you have what it takes to be Bold, submit your cover letter and resume!
