

STAT 4520: Sampling Techniques I, Fall 2009 (A01)

Tentative Course Outline

Instructor: Brad Johnson
Office: 322 Machray Hall
E-mail: brad_johnson@umanitoba.ca (**Note:** I will only respond to e-mail from UManNet ID's)

Class-time: TTh 10:00 a.m. – 11:15 a.m.
Location: 316 Machray Hall
Office hours: Open door policy — if my door is open, I am available for questions.

Calendar Description: A development of sampling theory for use in sample survey problems, in regression estimates, in systematic sampling, sources of errors in surveys.

Prerequisite(s): STAT 3800 (or STAT 3600 or 005.360) (C), STAT 3480 (or 005.348) (C) [or STAT 3120 (or 005.312) (C) and STAT 3130 (or 005.313) (C)], or consent of department.

Course web-page: Course materials will be made available through the Angel Learning system (<https://angel.cc.umanitoba.ca/>).

Textbook: *Model Assisted Survey Sampling*. Carl-Erik Särndal, Bengt Swensson & Jan Wretman. Springer Series in Statistics. Springer: New York (2003). [≈\$46 CAD from amazon.ca]. Also on 2 hour reserve in the science library.

Other Resources: Not required. On 2 hour reserve in the Science Library
Sampling Techniques (3rd Ed.). W. G. Cochran. Wiley: New York (1977).
Sampling (2nd Ed.). S. K. Thompson. Wiley: New York (2002).
Sampling of Populations. (3rd Ed.). Levy & Lemeshow. Wiley: New York (1991).
Sampling: Design and Analysis. S. L. Lohr. Duxbury Press: Toronto (1999).

Topics: This is a tentative list of topics we will cover:

- Introduction, basic concepts and definitions (Chapter 1).
- Basic ideas in probability samples (Chapter 2).
- Unbiased estimation for element sampling designs — SRS, Systematic Sampling, Stratified Random Sampling (Chapter 3).
- Single stage cluster sampling (parts of Chapter 4).
- Ratio and regression estimates (parts of Chapters 5, 6 and 7)
- Other topics as time permits.

2009 Pandemic Advisory: Should major disruptions to university activities occur as a result of a pandemic, the course content, marks breakdown, and other provisions of this document may be adjusted as the circumstances warrant.

Midterm Exams: There will be 2 in-class mid-term exams, each worth 22.5% of your final grade. The tentative dates are October 8 and November 10 (2009) but these are **subject to change**.

Note: There will not be any makeup (deferred) mid-term exams for this course. If you miss a mid-term exam, **have a valid excuse**, and **notify me within 48 hours of the scheduled exam**, your final exam will be re-weighted to account for an additional 22.5% of your final grade per test.

Assignments: There will be no *formal* assignments for this course. The distributed lecture notes have a number of exercises and questions (most are marked by ★'s in the margins) which I may add to. The midterm tests and final examination will be based, in part, on these or similar problems. You are free (and encouraged) to work in groups on these but you must be able to complete the work individually on tests/examinations. Additional problems may be posted to the Angel Learning system (<https://angel.cc.umanitoba.ca/>).

Project: During the term you will be required to complete a group project worth 15% of your final grade. The groups and topics will be determined by myself and more information will be given early in the term.

Grading Scheme:	Mid-term Test 1	22.5%
	Mid-term Test 2	22.5%
	Project	15.0%
	Final Exam	40%
	Total	100%

Voluntary Withdrawal: The voluntary withdrawal deadline is **November 18, 2009**.

Academic Dishonesty: It is important that you understand what constitutes academic dishonesty and that you are familiar with the very serious consequences. Links to resources that describe academic dishonesty (including plagiarism, cheating, inappropriate collaboration and examination impersonation) can be found at: umanitoba.ca/science/student/webdisciplinedocuments.html or through the Faculty of Science home page at: www.umanitoba.ca/science. Typical penalties imposed within the Faculty of Science for academic dishonesty are also described. See also the sections in *THE UNIVERSITY OF MANITOBA UNDERGRADUATE CALENDAR 2009–2010* dealing with academic integrity, including plagiarism, cheating and (im)personation at examinations (Sections 4.2.8 on page 28 and 7 on page 29).

2007-2009 IMPORTANT NOTE TO STUDENTS FROM THE FACULTY OF REGISTRATION SCIENCE:

ADVISORY: It is your responsibility to ensure that you are entitled to be registered in this course. This means that you:

- have the appropriate prerequisites, as noted in the calendar description, or have permission from the instructor to waive these prerequisites;
- have not previously taken, or are concurrently registered in, this course and another that has been identified as “not to be held with” in the course description. For example, BIOL 1000 cannot be held for credit with BIOL 1020.

The registration system may have allowed you to register in this course, but it is your responsibility to check. If you are not entitled to be in this course, you will be withdrawn, or the course may not be used in your degree program. There will be no fee adjustment. This is not appealable. Please be sure to read the course description for this and every course in which you are registered.
